

Helping Mississippians live happier, healthier lives!

BROCCOLI

is a super vegetable that can be enjoyed raw or cooked, alone as a yummy side, or added to salads or cooked dishes like pastas, soups, stir-fries, casseroles. If you are not a fan of raw broccoli, try blanching which makes broccoli more tender and less bitter. Use the following tips to help your family enjoy more broccoli!

STORE

- Keep fresh broccoli in an open plastic bag in the refrigerator for up to five days.
- If you have produce drawers in your refrigerator, keep vegetables in one and fruits in another.

Fresh broccoli can be blanched and frozen to keep color, flavor, and nutrients longer.

SELECT

When selecting broccoli look for tight, dark green florets and firm stems.

Avoid broccoli with an odor or yellow opening buds.

In Mississippi, purchase fresh broccoli in April and May or October and November when it is less expensive and more readily available.

During the off-season, choose frozen broccoli (that may cost less than fresh.)

FUN WITH FOOD

CHILDREN CAN HELP:

- At the grocery store allow children to select broccoli.
- In the kitchen children can wash broccoli and prepare an ice bath to place broccoli in after blanching.

CHILDREN CAN LEARN:

- Raw or blanched broccoli makes a quick and easy snack and is fun to eat with healthy dips.
- The florets are the flowers of the broccoli plant, so they are eating flowers!

PREPARE

To make bite-sized pieces: cut right below the top to remove the stem of fresh broccoli, then cut through the stems of the pieces.

Rinse bite-sized pieces just before using.

Be careful not to overcook broccoli! Crispy, tender broccoli is what you are looking for, not mushy, soft broccoli.
