GREEN BEANS

Green bean, string bean, snap bean—they're all the same! Despite their name, they're not always green; they can be yellow, purple, or even speckled. Green beans are one of America's most

popular vegetables. They are tasty and contain valuable nutrients! Available year-round, they are especially plentiful in spring and summer.

SELECT

- Select fresh, frozen, or canned green beans.
- Choose fresh, bright-colored beans that are firm and snap easily when bent.
 - Once you see the seeds inside bulging, green beans are past their peak and may be tough to eat.
- Choose unseasoned canned green beans with “no salt added” on the can.

PREPARE

- One pound of fresh green beans is equal to 2 cups of cooked.
- To prepare fresh green beans, wash them under cool running water; snap or cut off the tips; and leave whole or cut or snap to the desired length.
- Boil, microwave, steam, sauté, roast, or stir-fry the green beans to your desired tenderness.
- Avoid overcooking or they will be mushy and lose their bright green color.

STORE

- Store fresh beans in a moisture-proof, airtight container in the refrigerator.
- Beans can be kept fresh for about 4 days, or blanched and frozen immediately after harvesting.

FUN WITH FOOD

KIDS CAN HELP:

- Select fresh green beans at your local grocery store or farmers market.
- In the kitchen, children can wash, snap, and help prepare green beans to be cooked.

KIDS CAN ENJOY:

- Try green bean french fries! Sprinkle fresh green beans with a little olive oil, salt, and pepper. Spread them out on a shallow pan. Roast at 400°F for 20–25 minutes, turning them over when they're halfway done.
- Bright green and crunchy, green beans are great dippers. Try them with your favorite low-fat dip or salad dressing.
